INTERNATIONAL GRANNIES'S CASTING DEFENDING THE RIGHT TO AN OPEN AND FREE ACCESS TO THE INTERNET.

“They want to vote the Telecommunication package at the European Parliament as if we were fools...

Ah! With the excuse of “new options for the consumer” and “according to our necessities”... Think we are stupid...

What options! Internet according to our necessities is a free and open internet. That's all. As a whole, not in pieces as they say. What else could it be?...

The last thing we need is that a certain mister from a private company, from a DSL provider, or from a Collective Management Entity, or... could tell me what I can do and what I cannot do with my DSL ... or what can flow or not.

What a government! If we don't warn them they will end up doing whatever stupidity. Internet is our access to the information, my son, you are there to protect it, not to bargain! Oh dear! we have to tell them everything!

Come on, let's give them a hand, or they will get confused. Look, here we send you this letter that clearly explains what you have to vote, OK? (NOTE: make the action with the blackout eu web site). Everything is explained, you cannot mess it up. It's May 5th. Do not forget!

Here we'll check how you vote (NOTE: points to the screen)

Listen, I don't know what else I can do. If not, in June elections we will not send you to Europe anymore. Come on guys, do your homeworks!
